

METHOD AND APPARATUS FOR WIRELESS WORKFORCE MOBILIZATION  
AND MANAGEMENT

ABSTRACT OF THE DISCLOSURE

[0028] A method of tracking and assigning personnel in real-time via a wireless communication network includes receiving a request, via the wireless communication network, to perform a task. The method further includes searching a database to identify personnel to perform the task, verifying the availability of identified personnel, assigning available personnel to perform the task, communicating assignment of personnel via the wireless communication network, and updating the database to reflect the assignment.
